

The logo for BARCO, featuring the word "BARCO" in white uppercase letters on a red rectangular background.

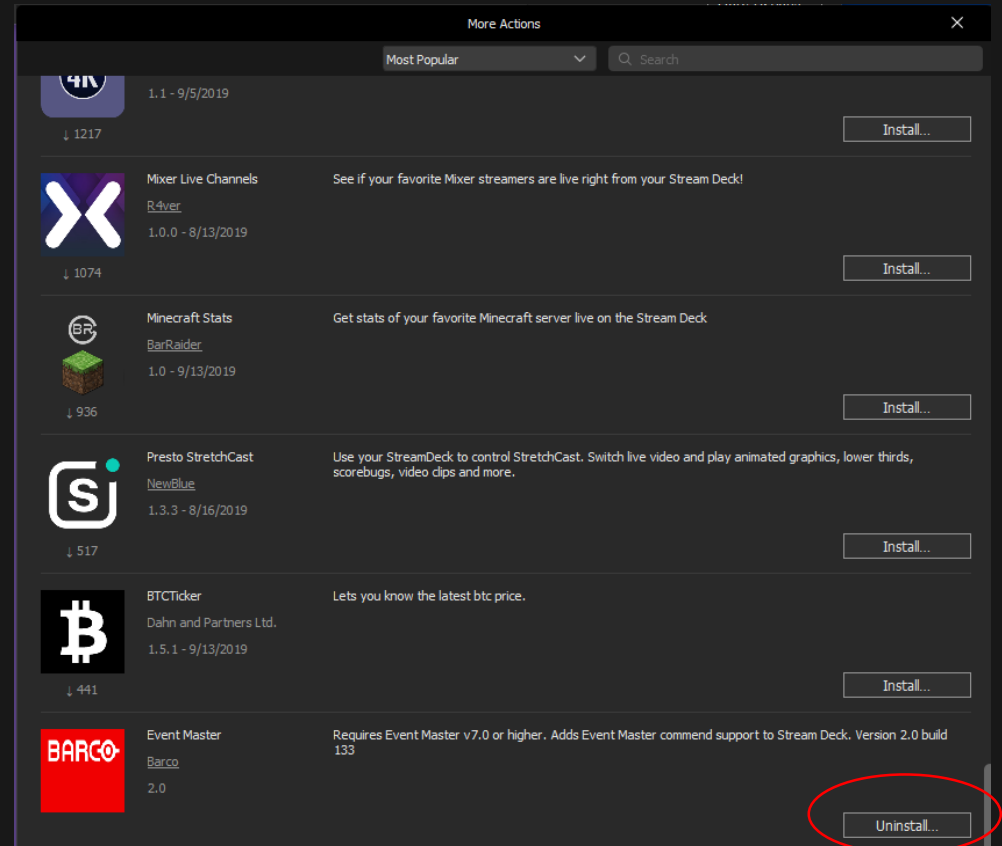

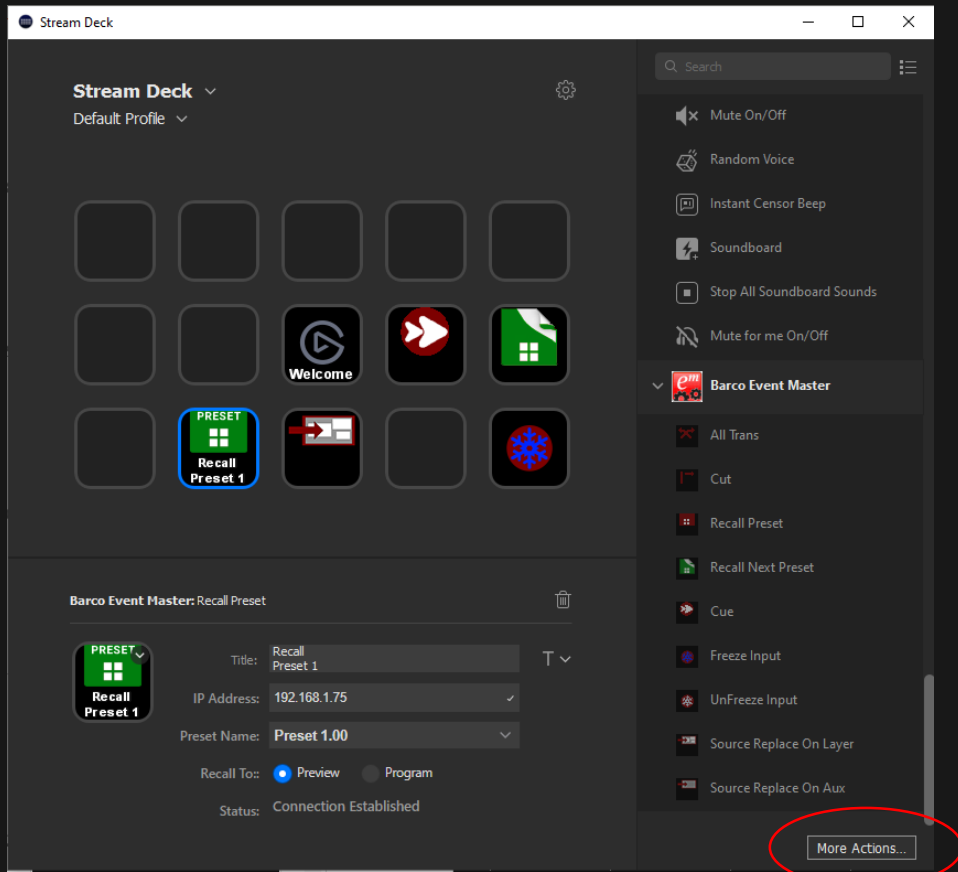

# Event Master Plugin for Stream Deck

v2.3

- *Requires Event Master version 7.0 or greater*
- *Requires Streamdeck version 4.1 or greater*

# To Upgrade, you must uninstall the existing StreamDeck Event Master plugin

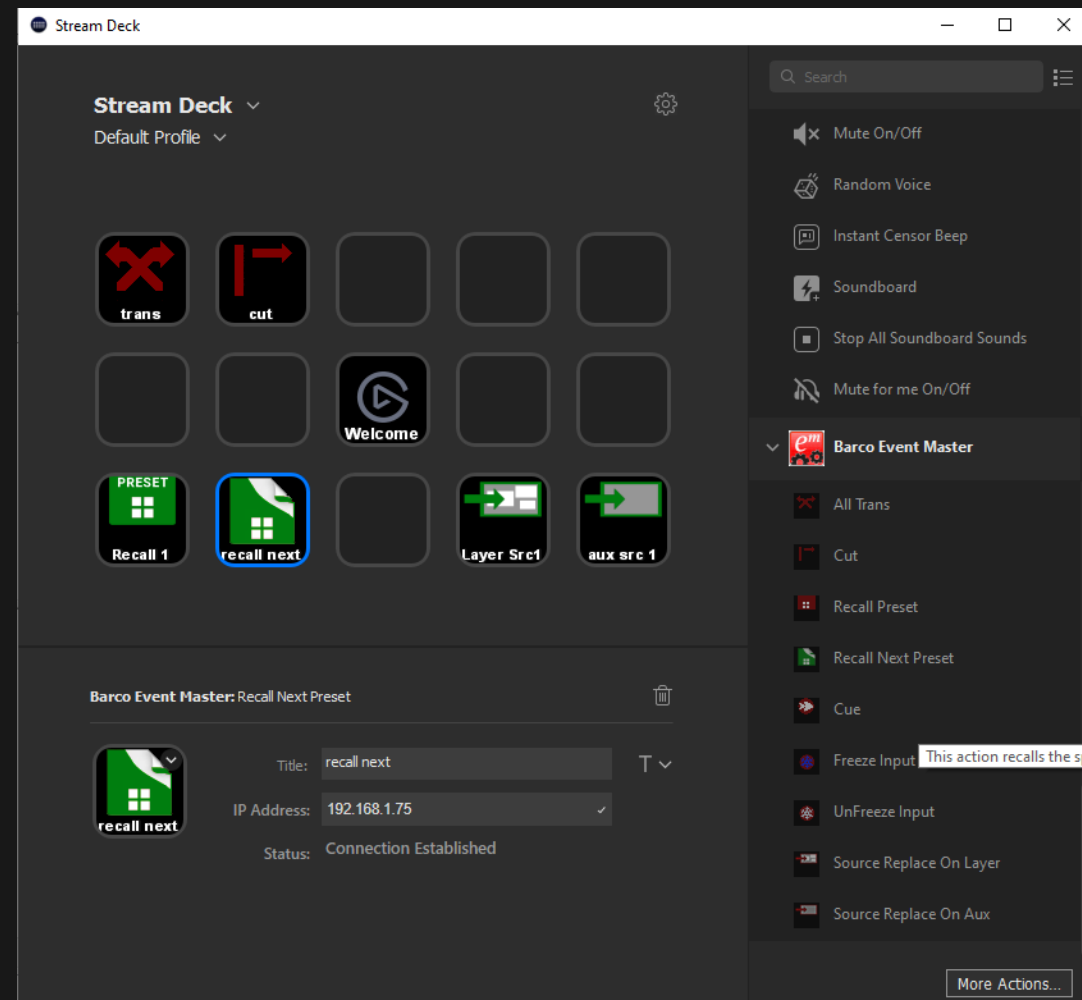

# Install the Stream Deck Event Master plugin

Name	Date modified	Type	Size
com.barco.eventmaster.streamDeckPlugin	3/21/2019 4:10 PM	Stream Deck Plugin	125 KB

Double clicking the plugin will automatically install it

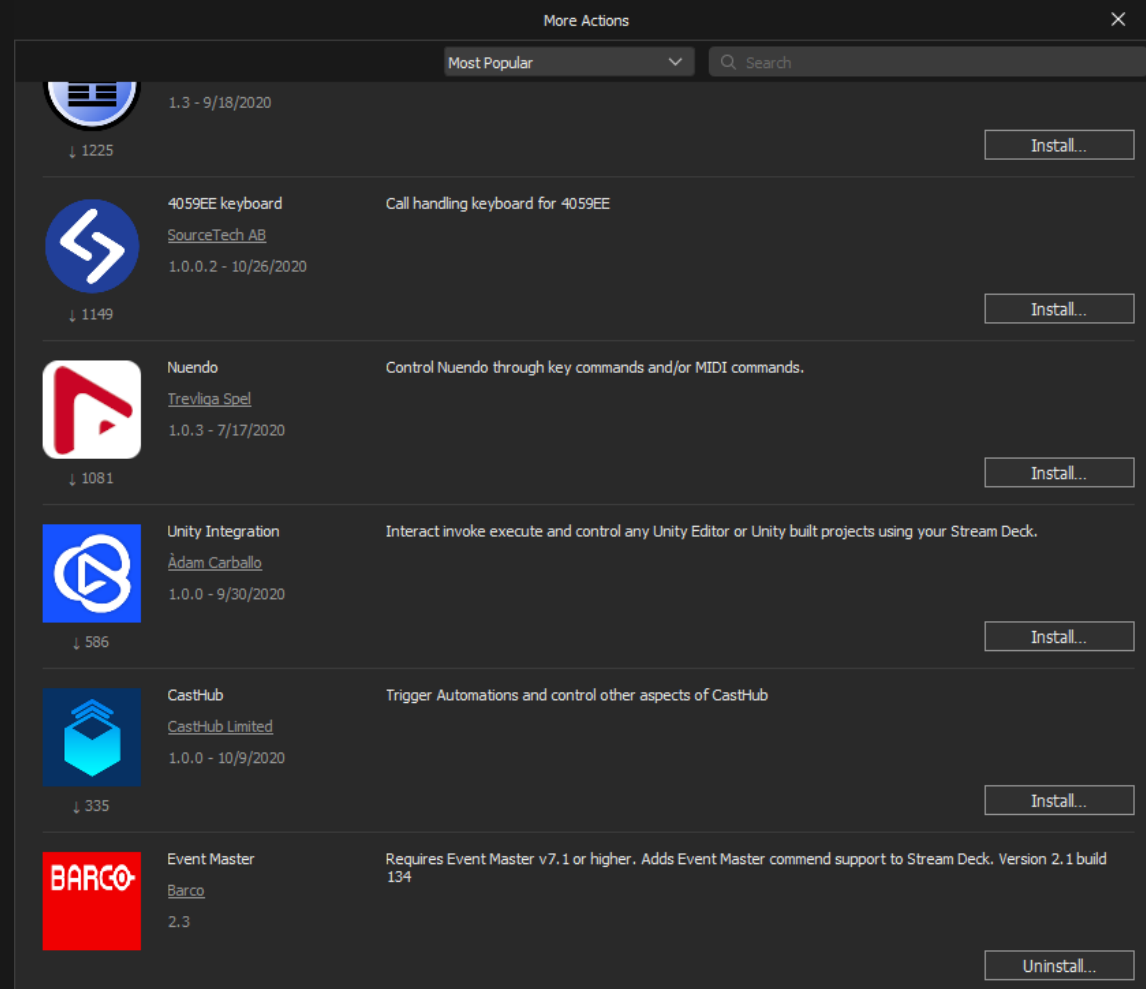

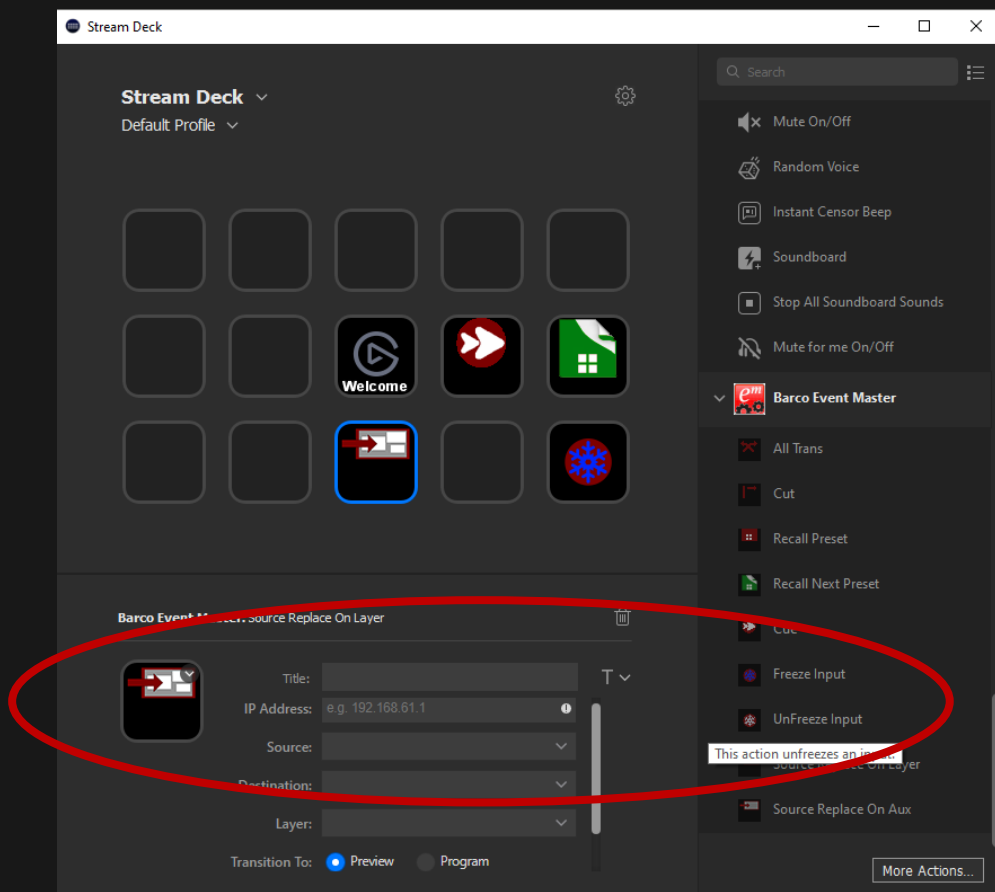

- Current version 2.3
- Compatible with Streamdeck v4.1 or greater

NOTE: You must uninstall the previous version before upgrading

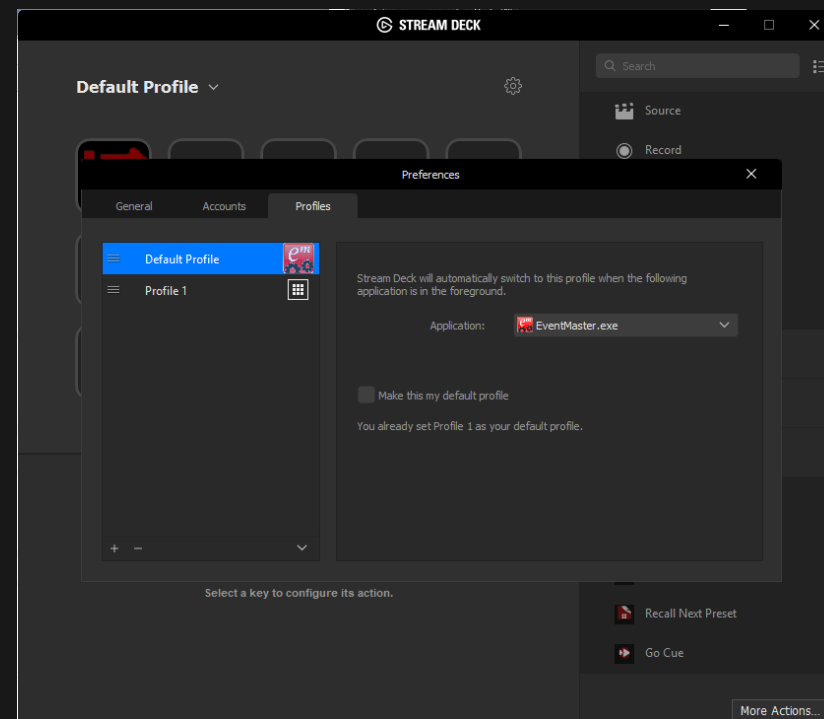

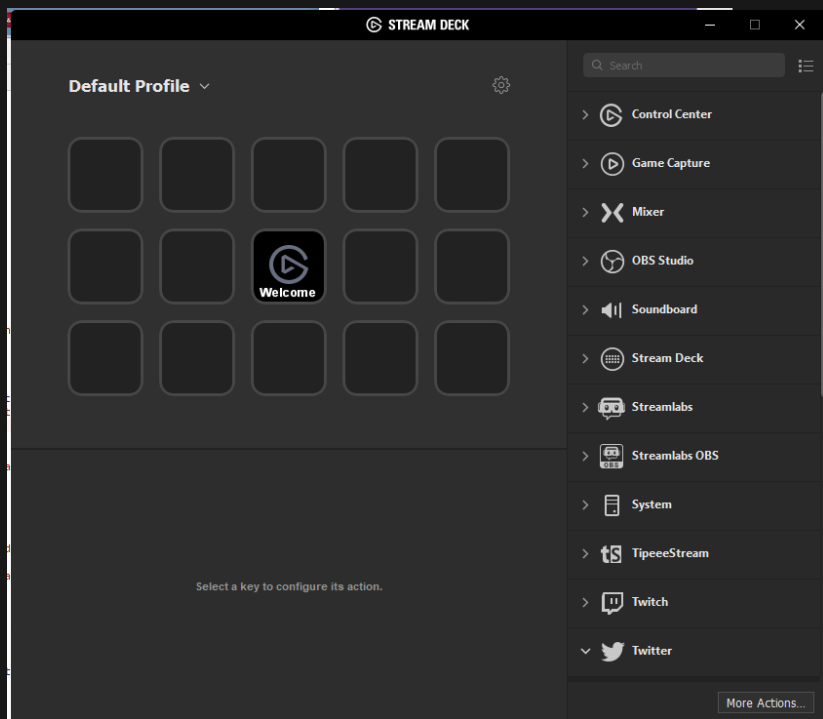

# What you should see after installing the plugin

# Automatically open EMT

Update profile preferences and select Event Master Toolset

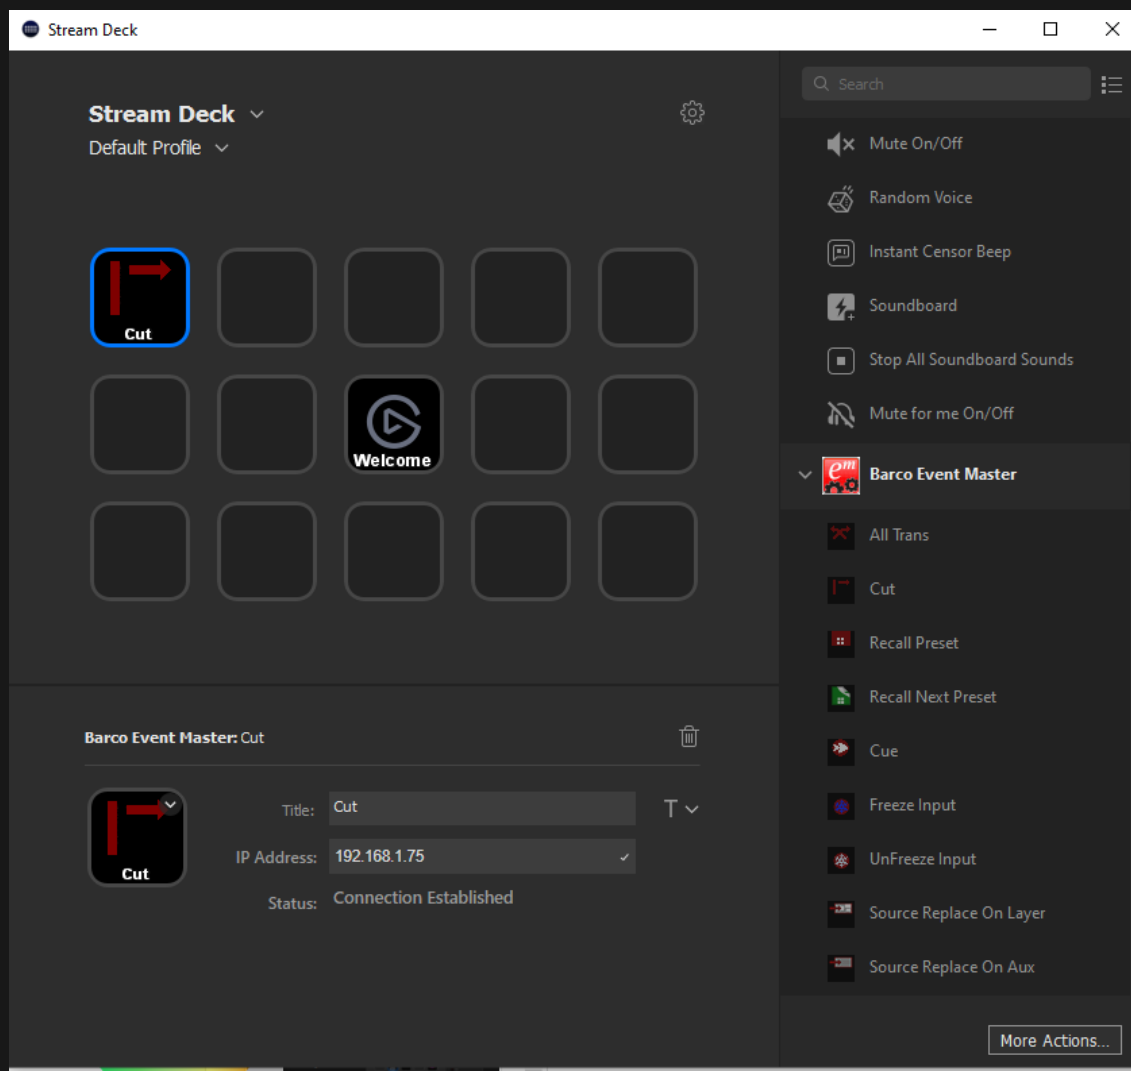

# Cut Action

Drag and drop the action icon to the desired button

Enter

- Button name
- EM Ip Address

Status will display  
"Connection  
Established" if able to  
connect to Event  
Master

# Recall Preset Action

Drag and drop the action icon to the desired button

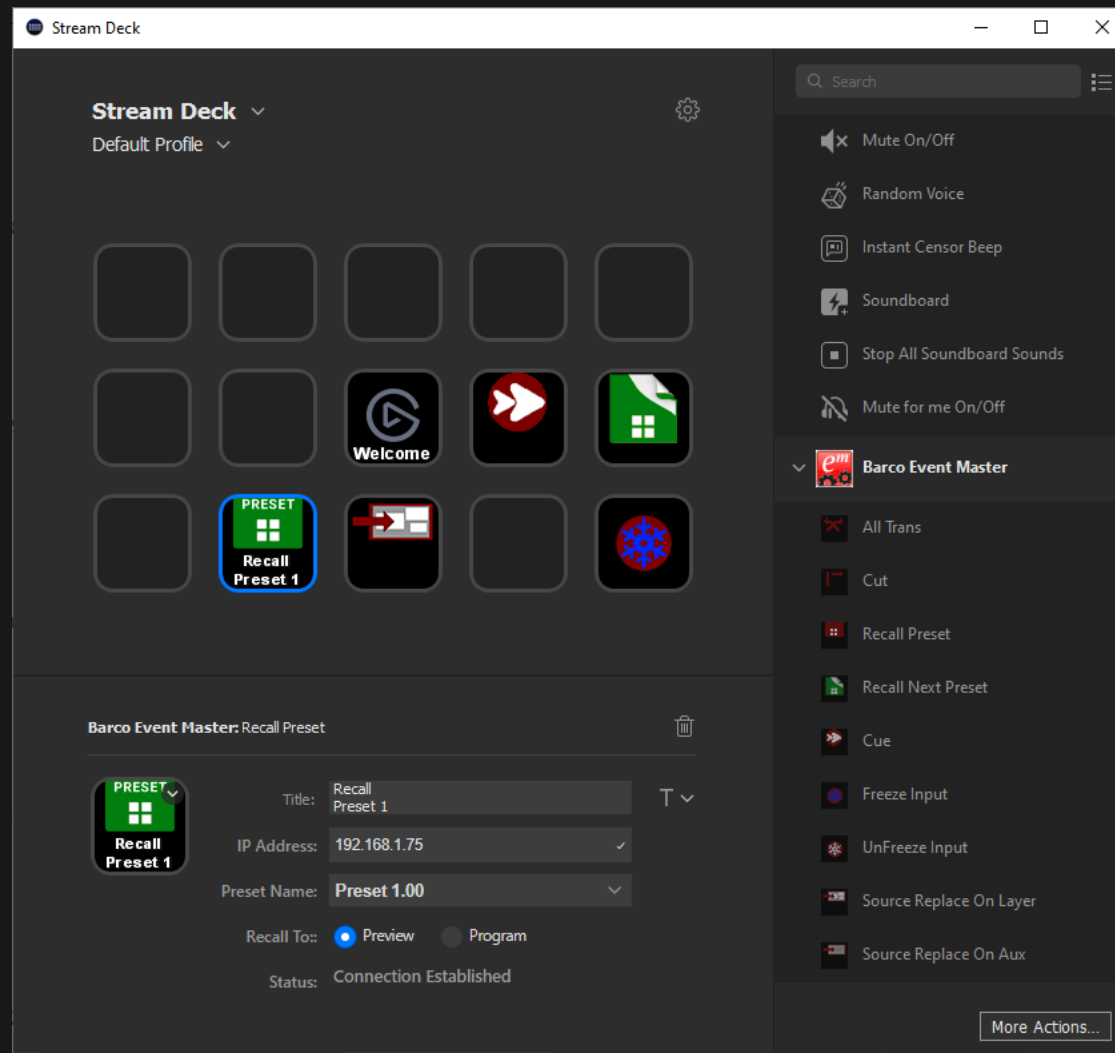

Enter:

- Button Name
- IP address

Select:

- Preset Name to recall
- Recall to Preview or Program

Status will display "Connection Established" if able to connect to Event Master

# Recall Next Preset Action

Drag and drop the action icon to the desired button

Enter:

- Button name
- EM Ip Address

Select:

- Preset
- Preview or Program

Status will display  
"Connection  
Established" if able to  
connect to Event  
Master

The screenshot shows the Stream Deck software interface. At the top, it says "Stream Deck" and "Page 3". Below this is a grid of buttons. One button is highlighted with a blue border and contains a green icon with a white grid and the text "PRESET" above "recall next". To its right is a button with a play icon and the text "Welcome". Below the grid is a configuration panel for "Barco Event Master: Recall Preset". This panel includes a dropdown menu for "Title" set to "recall next", a dropdown for "IP Address" set to "192.168.1.75", a dropdown for "Preset Name" set to "Preset 1.00", and radio buttons for "Recall To:" with "Preview" selected. The "Status:" field at the bottom of the panel displays "Connection Established". On the right side of the interface, there is a search bar and a list of actions, including "Recall Preset" and "Recall Next Preset". At the bottom right, there is a "More Actions..." button.

# Cue Action

Drag and drop the action icon to the desired button

Enter:

- Button Name
- IP address

Select

- Cue
- Cue play mode: Play, Pause or Stop the cue actions

Status will display "Connection Established" if able to connect to Event Master

# Source Replace on Layer Action

Drag and drop the action icon to the desired button

Action to change a source for a given screen destination and layer

Enter:

- Name
- IP address

Select:

- Source from the dropdown
- Screen Destination from the dropdown
- Layer from the dropdown

Status will display "Connection Established" if able to connect to Event Master

If the layer is a mix layer, the action will rely on the Preview or Program selection to determine the appropriate mix layer (A or B)

# Source Replace on Aux Action

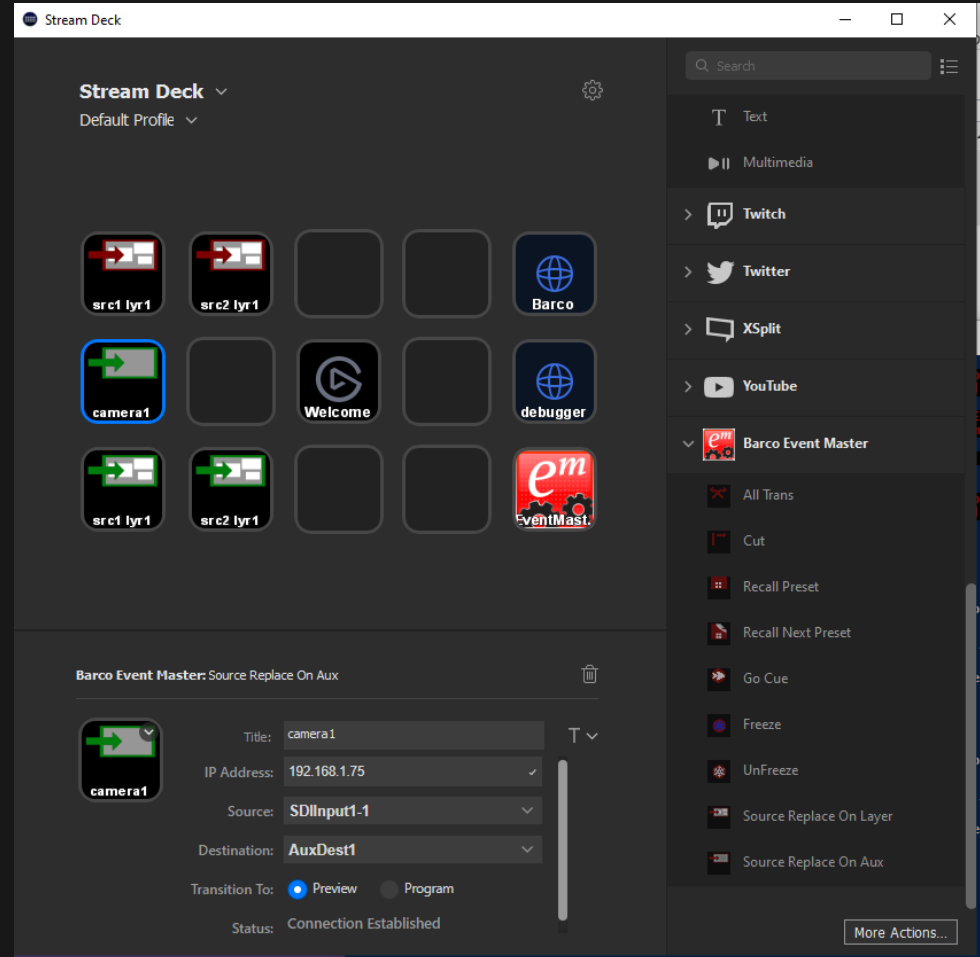

Drag and drop the action icon to the desired button

Action to change a source for a given aux destination and layer

Provide:

- Name and IP address
- Source from the dropdown
- Aux Destination from the dropdown

Status will display "Connection Established" if able to connect to Event Master

# Freeze and UnFreeze Actions

Drag and drop the action icon to the desired button

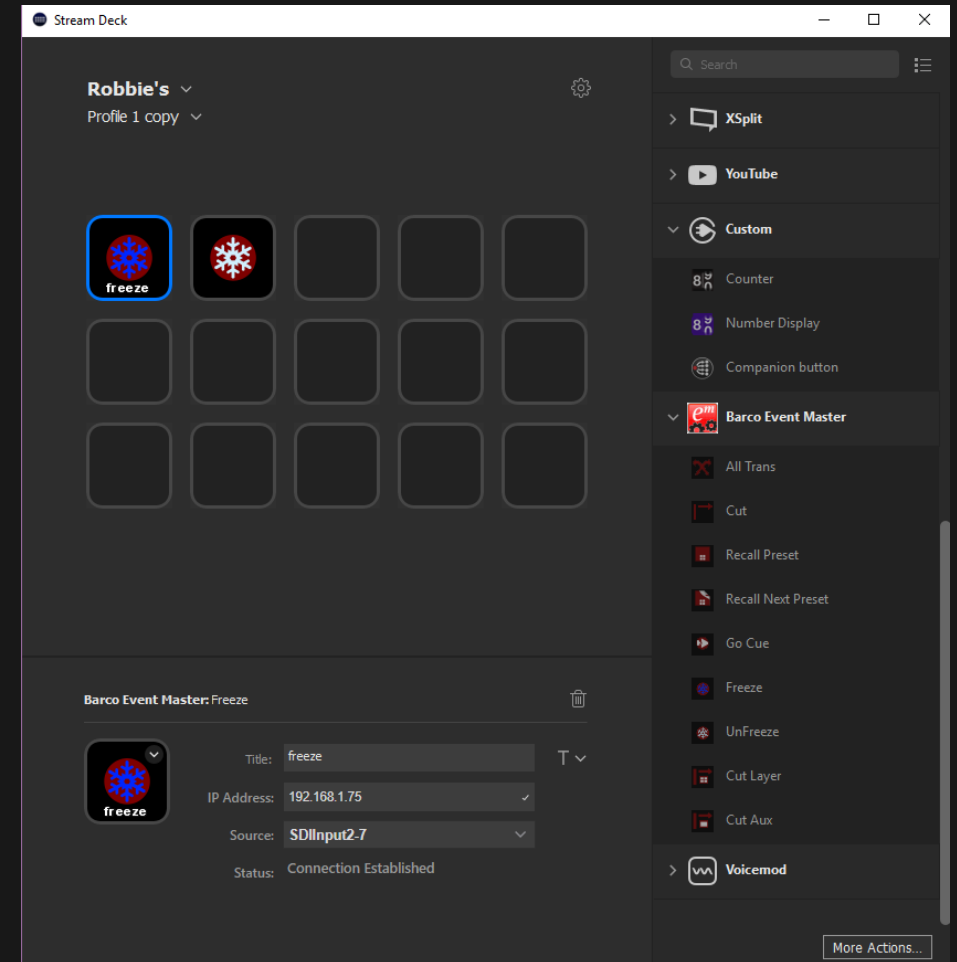

Action to freeze and unfreeze a given live input or background source

Provide:

- Name and IP address
- Source from the dropdown

Status will display "Connection Established" if able to connect to Event Master

Destination sources are not listed
