

The logo for BARCO, featuring the word "BARCO" in white uppercase letters on a red rectangular background.

Event Master Plugin for Stream Deck

v2.4

- *Requires Event Master version 7.0 or greater*
- *Requires Streamdeck version 4.1 or greater*

To Upgrade, you must uninstall the existing StreamDeck Event Master plugin

The screenshot shows the Stream Deck application window. On the left, a grid of buttons is visible, with one button labeled 'PRESET Recall Preset 1' highlighted with a blue border. Below the grid, the configuration for the 'Barco Event Master: Recall Preset' is shown, including fields for Title, IP Address, Preset Name, and Recall To options. On the right, a list of actions is displayed, including 'Mute On/Off', 'Random Voice', 'Instant Censor Beep', 'Soundboard', 'Stop All Soundboard Sounds', 'Mute for me On/Off', and 'Barco Event Master'. The 'Barco Event Master' section lists actions like 'All Trans', 'Cut', 'Recall Preset', 'Recall Next Preset', 'Cue', 'Freeze Input', 'Unfreeze Input', 'Source Replace On Layer', and 'Source Replace On Aux'. At the bottom right of this list, a 'More Actions...' button is circled in red.

The screenshot shows the 'More Actions' window, which displays a list of available plugins. The list includes '411', 'Mixer Live Channels', 'Minecraft Stats', 'Presto StretchCast', 'BTCticker', and 'Event Master'. The 'Event Master' plugin is highlighted at the bottom of the list. Its details include the version '2.0' and a note: 'Requires Event Master v7.0 or higher. Adds Event Master commend support to Stream Deck. Version 2.0 build 133'. The 'Uninstall...' button for this plugin is circled in red.

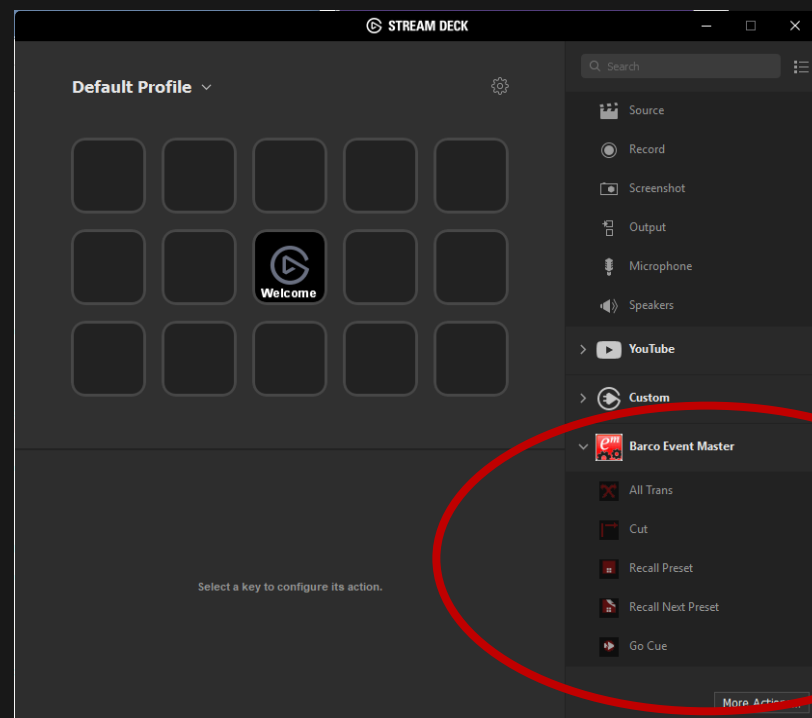

Install the Stream Deck Event Master plugin

Name	Date modified	Type	Size
 com.barco.eventmaster.streamDeckPlugin	3/21/2019 4:10 PM	Stream Deck Plugin	125 KB

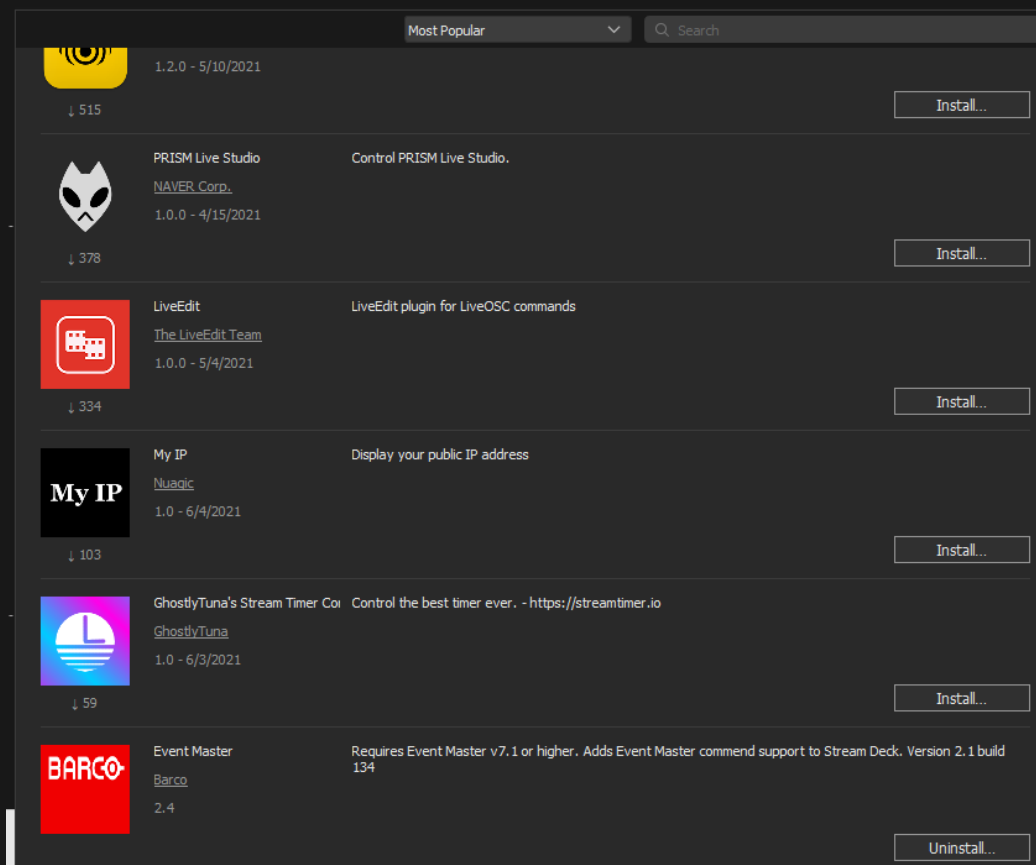

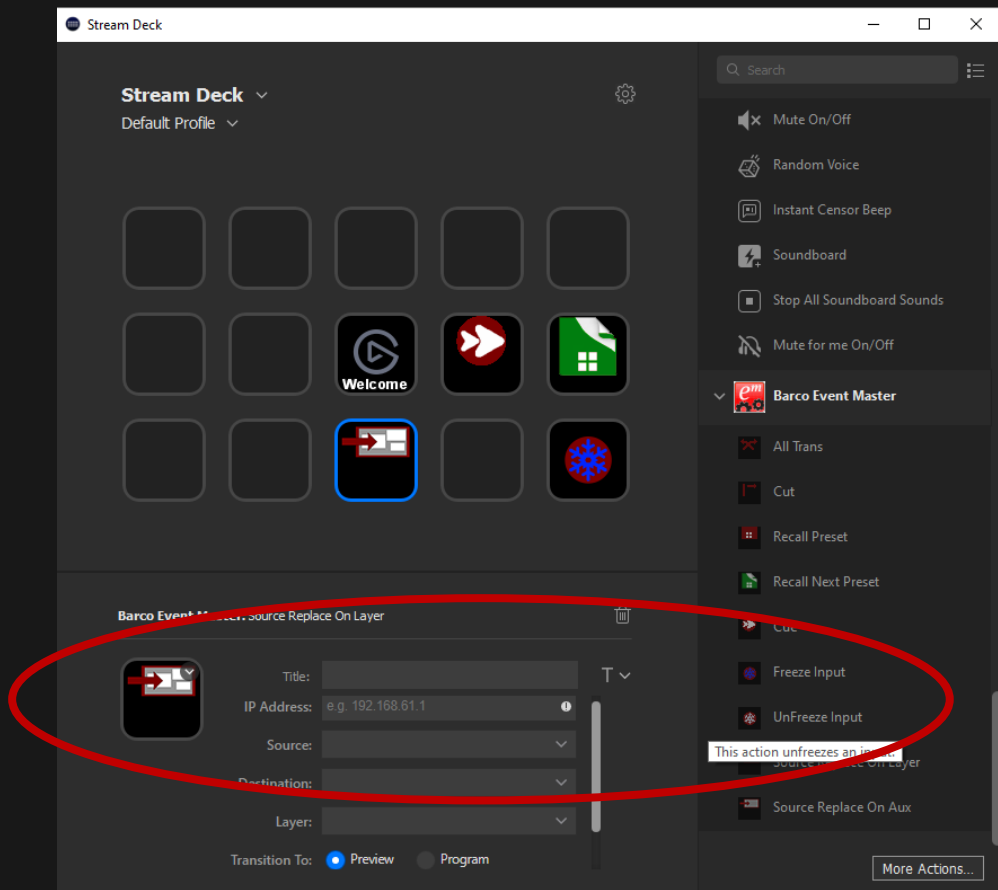

Double clicking the plugin will automatically install it

Drag and drop the action icon to the desired button

Enter:

- Button name
- EM Ip Address

Select:

- Preset
- Preview or Program

Status will display
"Connection
Established" if able to
connect to Event
Master

The screenshot shows the Stream Deck software interface. At the top, it says "Stream Deck" and "Page 3". Below this is a grid of buttons. One button is highlighted with a blue border and contains a green icon with a white grid and the text "PRESET" above "recall next". To its right is a button with a play icon and the text "Welcome". Below the grid is a configuration panel for "Barco Event Master: Recall Preset". This panel includes a dropdown menu for "Title" set to "recall next", a dropdown for "IP Address" set to "192.168.1.75", a dropdown for "Preset Name" set to "Preset 1.00", and radio buttons for "Recall To:" with "Preview" selected. The "Status:" field at the bottom of the panel displays "Connection Established". On the right side of the interface, there is a search bar and a list of actions, including "Recall Preset" and "Recall Next Preset". A "More Actions..." button is located at the bottom right of the interface.

Cue Action

Drag and drop the action icon to the desired button

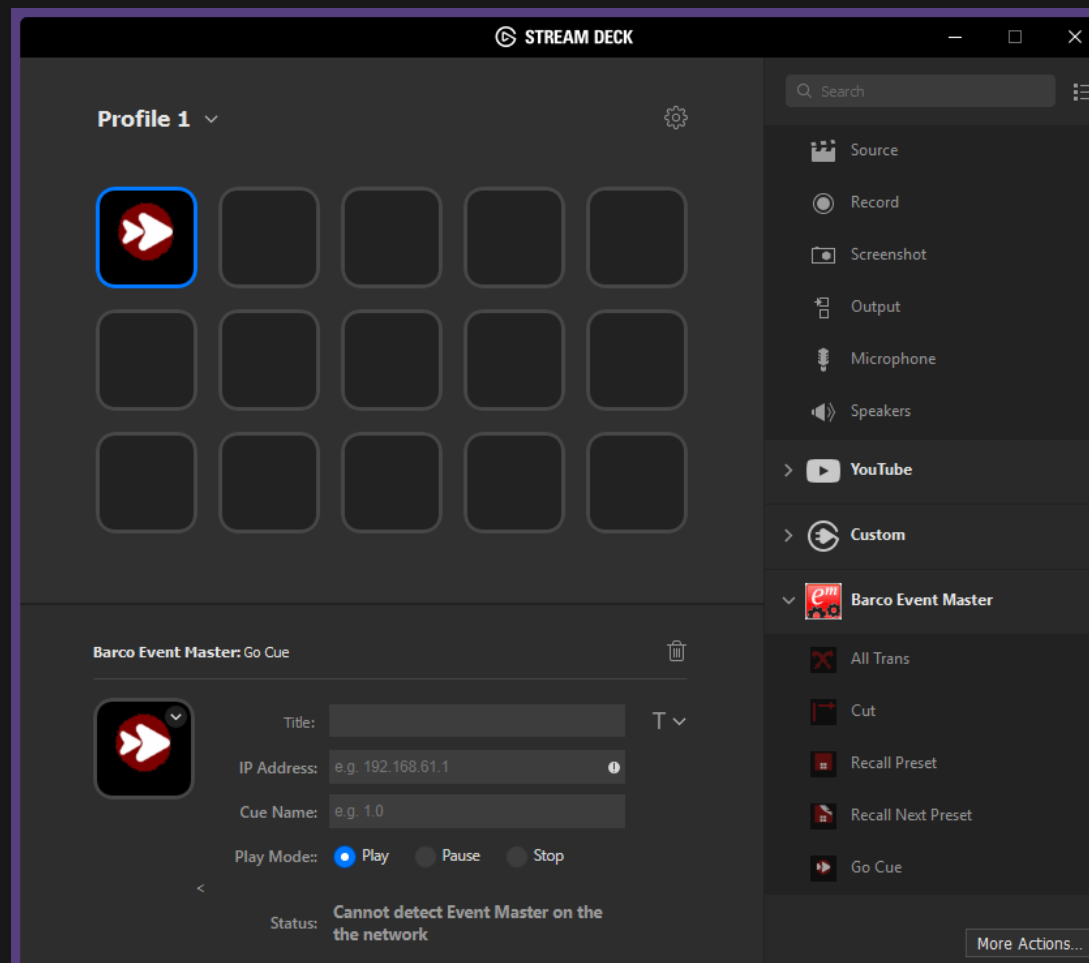

Enter:

- Button Name
- IP address

Select

- Cue
- Cue play mode: Play, Pause or Stop the cue actions

Status will display "Connection Established" if able to connect to Event Master

Source Replace on Layer Action

Drag and drop the action icon to the desired button

Action to change a source for a given screen destination and layer

Enter:

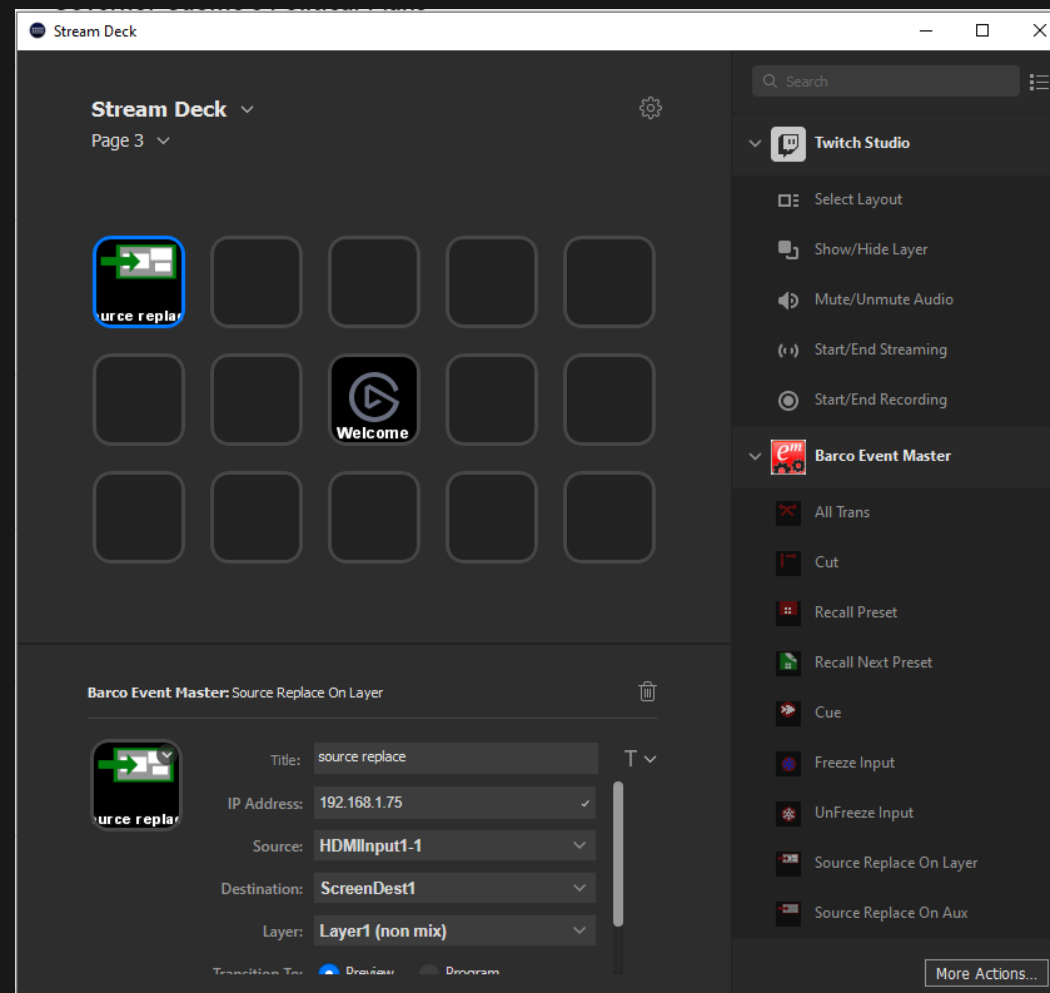

- Name
- IP address

Select:

- Source from the dropdown
- Screen Destination from the dropdown
- Layer from the dropdown

Status will display "Connection Established" if able to connect to Event Master

If the layer is a mix layer, the action will rely on the Preview or Program selection to determine the appropriate mix layer (A or B)

Source Replace on Aux Action

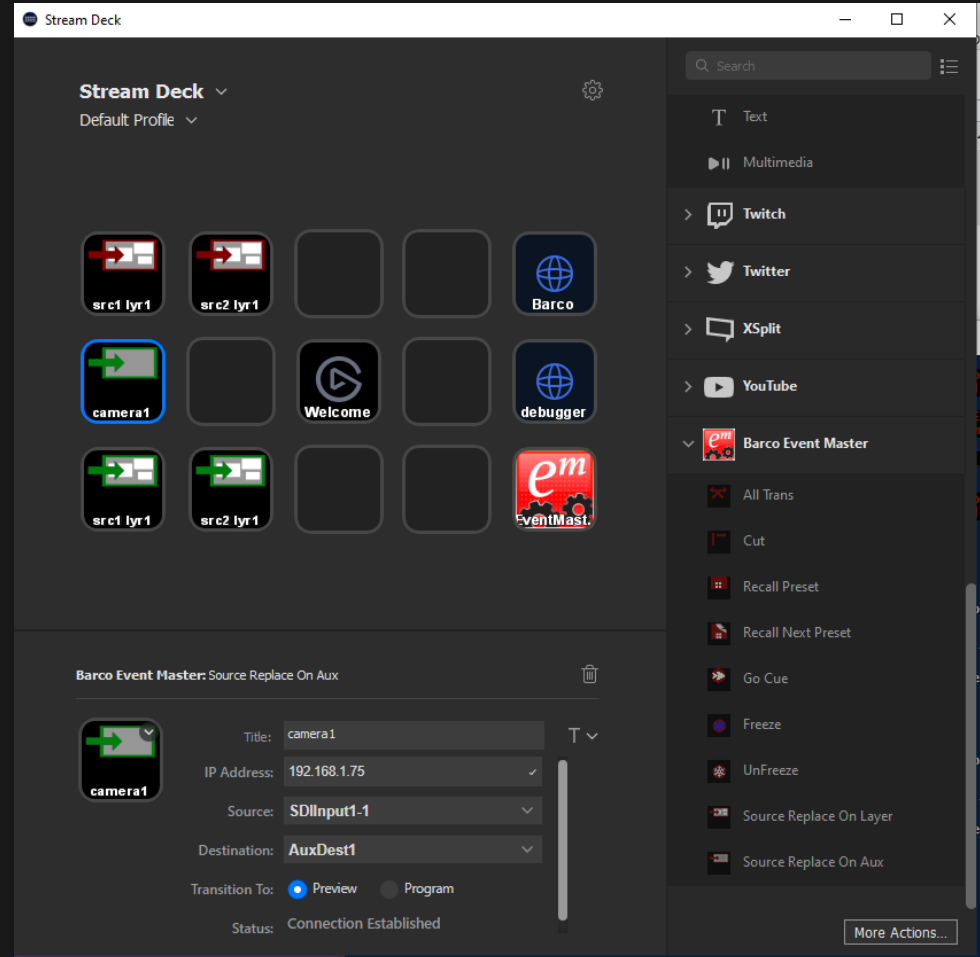

Drag and drop the action icon to the desired button

Action to change a source for a given aux destination and layer

Provide:

- Name and IP address
- Source from the dropdown
- Aux Destination from the dropdown

Status will display "Connection Established" if able to connect to Event Master

Freeze and UnFreeze Actions

Drag and drop the action icon to the desired button

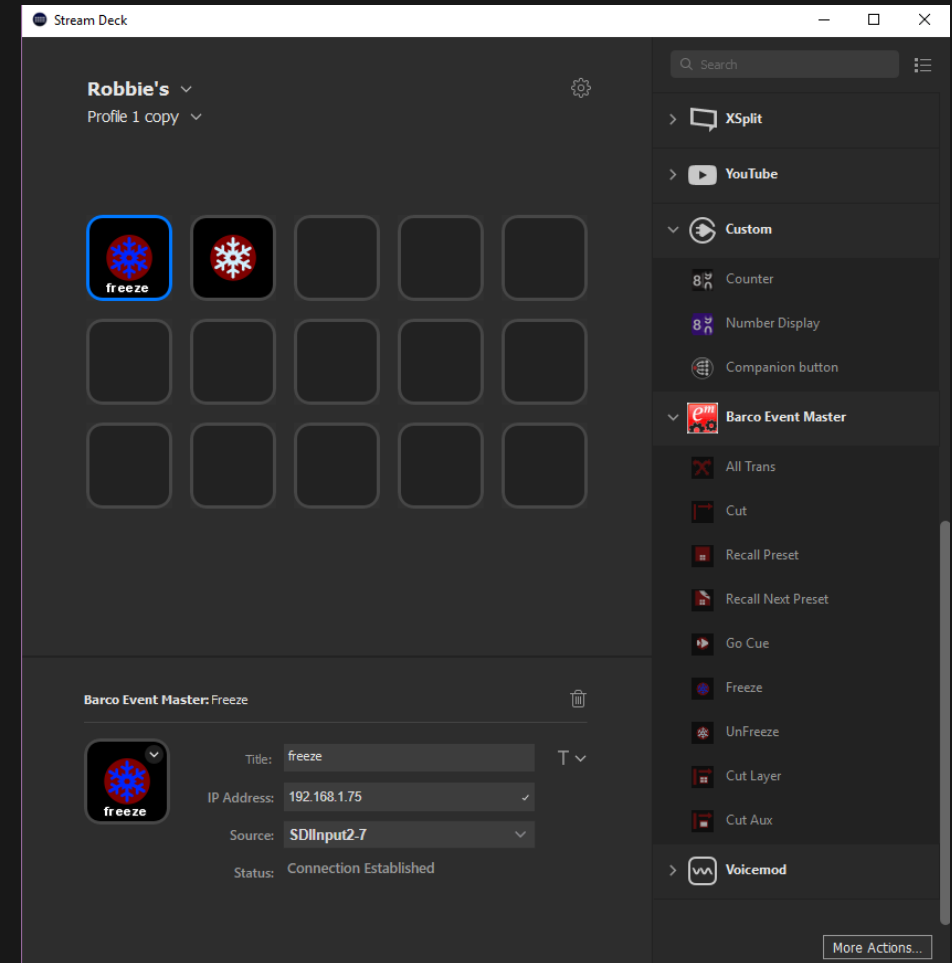

Action to freeze and unfreeze a given live input or background source

Provide:

- Name and IP address
- Source from the dropdown

Status will display "Connection Established" if able to connect to Event Master

Destination sources are not listed
